

Ashish Patel

Full Stack Developer

Phone: 7509650490 | Email: ashish77uab@gmail.com

Location: Indore, Madhya Pradesh 452001, India

GitHub: <https://github.com/ashish77uab> | LinkedIn: <https://www.linkedin.com/in/ashish-patel-1a406615a/>

PROFESSIONAL SUMMARY

Accomplished Full Stack Developer with 4+ years of experience specializing in React and Node.js-based applications. Proven track record of delivering production-ready web applications with robust feature sets, scalable architecture, and optimized performance. Highly skilled in modern JavaScript frameworks, state management solutions, and RESTful API integrations to build seamless, user-centric experiences. Strong collaborator with hands-on experience in Agile development environments, code reviews, and advanced performance optimization techniques.

TECHNICAL SKILLS

- **Frontend** : JavaScript, React.js, Next.js, Redux Toolkit, HTML5, CSS3
- **Backend** : Node.js, Express.js, RESTful APIs, WebSockets, MongoDB, PostgreSQL, Sequelize
- **Development Arsenal**: Git, GitHub, GitLab, Visual Studio Code, Postman, Vite, Webpack, CI/CD pipelines, Ubuntu
- **Cloud** : AWS, Docker
- **Practices**: Agile/Scrum, System Design, Performance Optimization, Microservices Architecture

WORK HISTORY

Gammastack | Crystal IT Park, Indore, Madhya Pradesh

Full Stack Developer | Jan 2023 - Present

- **Application Development**: Led the development and deployment of more than two production-ready React applications, delivering scalable features and improved user experience through optimized frontend architecture.
- **Performance Optimization**: Improved application performance by approximately 40% using code splitting, lazy loading, asset optimization, memory management, and optimized component re-rendering.
- **Platform Development**: Contributed to the development of a casino gaming platform with 50+ features, including real-time betting workflows and multi-level authentication mechanisms.
- **Real-Time Features**: Implemented real-time data updates using Socket.IO, reducing API requests by ~60% and improving application responsiveness and user engagement.
- **Payment Integration**: Integrated multiple payment gateways including Stripe, PayPal, and Skrill, ensuring secure and reliable transaction processing.
- **Team Collaboration**: Mentored junior developers, participated in code reviews, and collaborated with cross-functional teams in an Agile environment, following structured Git workflows.

Codes for Tomorrow | Indore, Madhya Pradesh

Front End Developer | Jan 2022 - Dec 2023

- **Frontend Development**: Developed and maintained scalable React.js applications with reusable components and modular UI architecture, improving development efficiency and reducing feature delivery time across multiple projects.
- **Responsive Design**: Implemented responsive user interfaces using CSS Flexbox and Grid, resulting in improved cross-browser compatibility and consistent user experience across desktop and mobile devices.
- **Real-Time Features**: Implemented real-time UI updates using WebSockets / Socket.IO, enabling live notifications and status updates, which improved data freshness and user interaction within the application.
- **Code Quality**: Followed frontend best practices including modular component design, reusable UI patterns, ESLint and Prettier configurations, and structured project organization, leading to improved code maintainability and reduced UI-related defects.

EDUCATION

- **B.Tech** in Computer Science Engineering | 7.8 CGPA
University Institute of Technology, RGPV Bhopal / 2017-21
- **12th Grade** Higher Secondary Certificate | 88.6%
Central Academy Senior Secondary School, Rewa, Madhya Pradesh / 2015-16

KEY PROJECTS

- **Dino Gaming Responsive Platform:** Architected a production-grade betting and fantasy platform with a responsive, high-performance interface supporting 4,000+ daily active users and 99.9% uptime. **Engineered real-time odds, match updates, and betting events using WebSockets**, reliably handling 5,000+ concurrent connections. Optimized database queries and implemented server-side caching strategies, reducing API response times by 60% and platform latency by 40%. **Enhanced user engagement** by 35% through performance optimization, UI responsiveness, and data-driven UX improvements.
- **Stream DFS – Fantasy Sports Pick'em Platform:** Developed a real-time fantasy sports platform supporting 3,000+ daily active users, live scoring, and dynamic leaderboards. Implemented live match tracking and ranking systems using WebSockets, supporting 4,000+ concurrent users with low latency. Engineered **Redis-based caching** and state optimization to ensure fast leaderboard updates and consistent real-time performance. Modeled complex fantasy logic including scoring rules, rankings, and live updates with high accuracy and reliability. Designed a **scalable, reusable component architecture**, improving feature development speed by 45% and simplifying long-term maintenance.
- **Salon Marketplace – Appointment & Scheduling System:** Built a full-stack appointment management platform serving 10+ salons and 1,000+ active users with high reliability. Implemented **role-based access control (RBAC)** supporting multiple user roles with tailored dashboards and permissions. Integrated **real-time notifications and automated reminders**, reducing missed appointments by 70% and manual follow-ups by 85%. Designed and developed RESTful APIs capable of handling **200+ requests per minute with 99.5% system reliability**. Delivered seamless calendar synchronization to improve booking accuracy and operational efficiency.
- **Online Lottery & Draw Management Platform:** Engineered a **secure, production-ready online lottery platform** supporting ticket purchases, scheduled draws, and automated result processing. Designed and implemented **real-time draw updates and winner notifications** using WebSockets, ensuring instant result visibility for users. Integrated secure wallet and transaction management workflows, ensuring accuracy, consistency, and auditability of user balances. Implemented scheduled background jobs for draw execution, result settlement, and payout distribution with high reliability. Designed scalable APIs capable of **handling high traffic spikes during draw times**.

CERTIFICATIONS & ACHIEVEMENTS

- **Data Structures & Algorithms Certification** - FreeCodeCamp
- **Performance Engineering:** Achieved outstanding 40% performance enhancement across mobile applications through advanced code optimization techniques including bundle splitting, lazy loading implementation, image compression, memory leak prevention, and efficient state management architectural decisions.
- **Code Quality Excellence:** Maintained high code quality standards through comprehensive testing strategies, performance profiling, crash prevention mechanisms, and user-centric design principles ensuring robust application stability.
- **Algorithmic Problem Solving:** Demonstrated strong analytical capabilities with 450+ LeetCode problems solved and active contribution to GeeksforGeeks platform with 500+ practice problem completions.
- **Technical Leadership:** Provided mentorship to junior developers and facilitated technical architectural discussions for React based application development, best practices and innovative solution implementations
